

QUALITY POLICY

At Lacor Textil, we understand quality as a way of working and interacting. We are a textile industry auxiliary company located in the Plaza Logistics Platform, where we have more than 15,000 m² dedicated to developing customized solutions. Our goal is to provide value to our customers through efficient, sustainable services tailored to their needs.

OUR VALUE CREATION MODEL IS BASED ON THREE STRATEGIC PILLARS:

OPERATIONAL EXCELLENCE	PROFITABLE AND SUSTAINABLE GROWTH	CUSTOMER ORIENTATION
We always strive to do things right the first time, efficiently and safely.	We work towards balanced development that is environmentally responsible and focused on the long term.	A vision focused on the customer and our stakeholders: we put people at the center of every decision.

FOLLOWING THIS VISION, WE ARE GUIDED BY THE FOLLOWING COMMITMENTS:

- UNDERSTAND THE STAKEHOLDERS**

We promote cooperative relationships with our external and internal customers and stakeholders, working to meet and even exceed their needs and expectations, while complying with all legal, customer, and other requirements.

- MANAGE THROUGH DATA ANALYSIS**

We promote a robust quality management system supported by the measurement of indicators, conducting audits, setting objectives, and reviewing non-conformities. All this information enables us to make better decisions and adapt to changes with agility.

- DRIVE CONTINUOUS IMPROVEMENT AND INNOVATION**

We see mistakes as opportunities and promote a culture of innovation as a tool for growth and differentiation. All of this supports operational excellence and value creation.

- CARE FOR AND DEVELOP PEOPLE**

We are committed to continuous training and the development of our employees' skills, aware that talent, motivation, and team well-being are key to achieving the organization's goals.

This Quality Policy has been approved by the Board of Directors of Lacor Textil S.L. as an expression of its commitment to continuous improvement, stakeholder satisfaction, and excellence in managing its processes, resources, and transportation.

To achieve this, Management commits to leading and providing the necessary resources (human, technical, financial, and material) to ensure the fulfillment of defined objectives, working under a management system compliant with the UNE-EN ISO 9001 standard. This policy will be reviewed periodically and is available to all interested parties.

At Lacor Textil, we work every day to do things right, build trusting relationships, and provide solutions that make a difference.
